Executive Order and/or Statute

Oregon passed Senate Bill 889 in the 2019 legislative session with broad bipartisan support, creating the Health Care Cost Growth Target Program. The program is now codified in Oregon Revised Statute 442.386. The OHA has authority to convene an Implementation Committee to develop an implementation plan, establish a health care cost growth benchmark, establish methodologies for calculating health care cost growth, require data submissions, publish reports on health care cost growth and spending trends, and hold public hearings on cost growth. House Bill 2081 established enforcement mechanisms for those entities who exceed the cost growth target including requiring performance improvement plans and penalties. The Implementation Committee recommended that an ongoing governance committee oversee the the program, and an Advisory Committee was appointed in May 2022.

“"The concept of targets isn’t going to solve all things health care but it’s a pillar of our state health care plans in terms of where to expand coverage, contain costs, and drive value. This program will provide a lot of the data infrastructure to have an informed process about how to move forward on our goal of high-quality, affordable health care.”
